# ALL ABOUT PROGRAMMING

5-6 MARCH 2022

## ABOUT Event

ALL ABOUT PROGRAMMING is an initiative by our community where learners, developers and coders make themselves learn, design and code innovative solutions, Aptitude questions to tackle real-world problems.

The event will take place in the span of 2 days and will go through different interesting and enthusiastic rounds where participants will test their knowledge, learn new things about programming world, test their limits and skills

It doesn't matter if you're a beginner coder or a seasoned one, since ideas know no bounds.

## TIMELINE

### EVENT KICKOFF

Event starts. Teams arrive at the venue. Registrations are done & ID cards are given to every team.

### BUZZ QUIZ

The first round will be Aptitude quiz in which there will be company round based questions asked from the individual participants. The event will be of total 100 points.

### BUG HEIST

In this round you will be given few questions (code) in which you have to find the error in the given period of time.

### HACKATHON

Hackathon will be the last round of our event. Beginners will learn a lot of things and will try to implement their ideas. A concept will be given to check your limit of ideas and tricks to implement them through code.

### RESULTS

Result declaration  
Prize Distribution.  
Event ends.
