EDUCATION FIRST

Summer of code 2022

Sponsorship Brochure

GirlScript

GirlScript Foundation is a non-profit organization that promotes diversity in technology. It is a student-led community that helps beginners to learn and upskill.

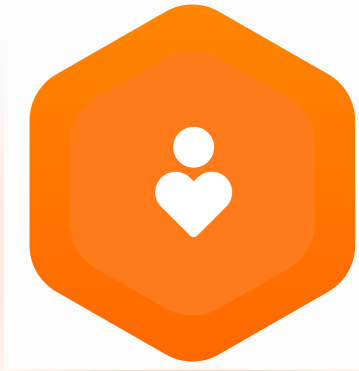

The “**GirlScript Chapters**” are student bodies spread across India in different cities. These chapters enable the students to participate and involve in the fastest growing community.

Founded in 2017, GirlScript is working in multiple regions and has helped thousands to begin their journey in tech.

Our Philosophy

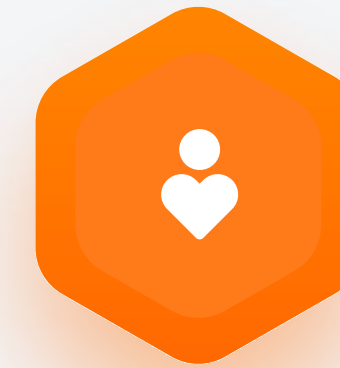

MISSION

- To empower people, especially underrepresented groups, by equipping them with technical and related necessary skills.
- To create local opportunity, growth, and impact via tech education worldwide and bring diversity in the tech domain.

VISION

- GirlScript aims to become the world's biggest tech community for learning technical skills and getting opportunities worldwide.
- We support diversity in tech, and thus we ensure 60% of women participation in every meet-ups, workshops and conference

GOALS

- To educate people in tech
- Remove myths about tech education
- Spread awareness about opportunities in tier two & tier-three cities add tech content that is helpful for everyone.

declared

Testimonials

The progress of my project **Share N Learn** during GSSoC was tremendous for both the UI and the backend development. The contributions by all the contributors and mentors were really appreciated. My experience in GSSoC'21 was good. It was really great to see the enthusiasm among mentees to contribute to various projects till the end of the program. The steps taken by the organizing team for the smooth progress of the program were commendable. Thanks a ton, Girlscript Summer of Code 2021 Team, for organizing such a wonderful event.

Chirag Kakar

Project Admin,
Share N Learn,
GSSoC'21

It was the first time I was involved in GSSoC as a mentor, and the experience was pretty good. I got the opportunity to improve my mentorship skills, learn more about good GitHub practices and improve my knowledge in tech through the project I was assigned. I also got to mentor some great mentees who were passionate about the project and tech and wanted to have a good open-source contribution. The Project Admin was very enthusiastic and worked together with the contributors as a team.

Oshi Gupta

Mentor,
Friday,
GSSoC'21

It is rightly said that knowledge is of no value unless you put it into practice. Initially, I had started my journey into GirlScript Summer of Code 2021 with very little knowledge, but now I have gained a lot of experience in it. I had a great time working with the mentors who were always there to guide me. Thank you GirlScript Summer of Code 2021 for an awesome program and the project mentors.

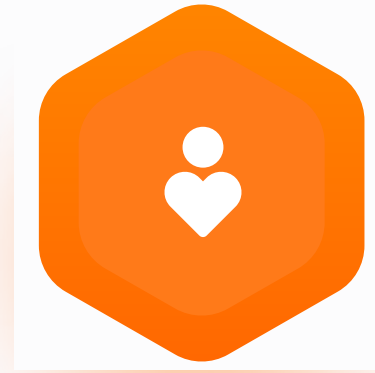

Debashish Kumar Sahoo,

Participant,
GSSoC'21

Previous Sponsors

Why Sponsor Us?

BRAND AWARENESS

- There will be a continuous promotion for six months on the official website of GirlScript Summer of Code.
- You will get an opportunity to put your business front and center and present your brand to a wide audience.

HIRING

- GirlScript Summer of Code will see a vast number of technically talented people with multiple skills. You can connect with them and possibly even hire them.

FEASIBLE MARKETING

- Our sponsorship slabs are reasonably priced to ensure maximum benefits and perks to our sponsors.

FLEXIBILITY

- We are open to sponsorships in many forms. With us, you can get tailor-made sponsorship benefits that suit your needs.

WORKING FOR A CAUSE

- Girlscript is helping people to take their first step in technology. We strongly believe in equality and woman empowerment. Thus, we always ensure 50% women participation in all our technical events.

Sponsorship Tiers

Every penny donated, every incentive offered, and every subscription offered is led towards the betterment of students associated with the program. We celebrate the performance of Top Contributors, Top Mentors, and Top Project Admins every year. Your resources will add a bright shade to their work and efforts.
